

TradeStation will not accommodate customers entering into physical delivery of commodities underlying futures contracts.

To avoid deliveries of expiring futures contracts as well as those resulting from futures options contracts, customers must roll forward or close out positions prior to the applicable notice periods for physical delivery. TradeStation without prior notification to the customer may at its discretion, liquidate a customer's futures position in order to avoid an impending physical delivery. Customer may incur significant costs if a physical delivery takes place due to a customer holding a futures or futures option position into the delivery period.
