TIERED PLAN

25¢ - \$1.20
per contract, per side

Volume dependent

+ exchange, regulatory and overnight fees

Visit our website at TradeStation.com/pricing for additional information on pricing, market data and services.

Pricing is for per-trade equity accounts opened on or after March 3, 2017, or previously established per-trade equity account holders who elect to switch commission plans. An additional fee of \$0.40 per contract will be applied to all index options trades. Pricing is applicable to non-professional single-tier futures accounts on the published \$1.50 per contract, per side plan. Exchange, regulatory and overnight fees are not included in futures commission pricing. Accounts will receive free of charge TradeStation, RadarScreen®, OptionStation Pro, Portfolio Maestro, foreign exchange (forex) and Reuters Fundamental data and Benzinga news. Qualified equity accounts of non-professional subscribers will also receive AMEX, NASDAQ Level 1, NYSE and OPRA data free of charge. Qualified futures accounts of non-professional subscribers will also receive CME, CBOT, COMEX and NYMEX real-time Globex and E-mini Level 1 and Market Depth data free of charge. An annual fee of \$50 will apply to all single-tier per-trade equities accounts or single-tier futures accounts that fail to maintain an average end-of-month equity balance of at least \$2,000 or that fail to place at least five (5) trades in the preceding 12 months. If you opened prior to March 3, 2017, or intend to open: (1) another equities account under per-share, unbundled, different terms or promotions, or any other plan; or (2) a futures account under any other plan except the single-tier \$1.50 per contract, per side plan, a monthly \$99.95 account service fee will apply to accounts that fail to maintain an end-of-month equity balance of at least \$100,000 or trade at least 5,000 shares, at least 50 options contracts or 10 round-turn futures contracts in the preceding month. Visit www.TradeStation.com/pricing for full details and disclosures.

Options trading is not suitable for all investors. Your account to trade options will be considered and approved or disapproved based on all relevant factors, including your trading experience. Automated trading, as it relates to direct-access electronic order placement and execution of equity options trades, requires manual one-click verification before an order is sent. Each leg of a multi-leg spread incurs a commission and bid/ask cost that can be significant. A monthly account service fee of \$99.95 may apply. A \$14.95 fee applies for options exercises or assignments. For early options exercises or assignments, a \$1.50 per contract fee will apply, with a \$5.95 minimum. There is an Options Regulatory Fee applicable to all options transactions. This fee varies by options exchange, where an options trade executes and whether the broker responsible for the trade is a member of a particular exchange. As a result, TradeStation calculates a blended rate that equals or slightly exceeds the amount it is required to remit to the options exchange. A \$1 cancellation fee may apply. These costs will affect the profitability of all stock and options trades and should be considered prior to making any trade. Please visit TradeStation.com for relevant risk disclosures and a link to the document titled Characteristics and Risks of Standardized Options or call 1-888-OPTIONS to obtain a copy.
