

Windows 7

Click on Start, and in the “Search Programs and Files” box type UAC and then hit enter. The User Account Control Settings window will pop up.

Next, turn off UAC by moving the slider to the Never notify position, and then click OK. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.

To turn UAC back on, move the slider to choose when you want to be notified, and then click OK. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.

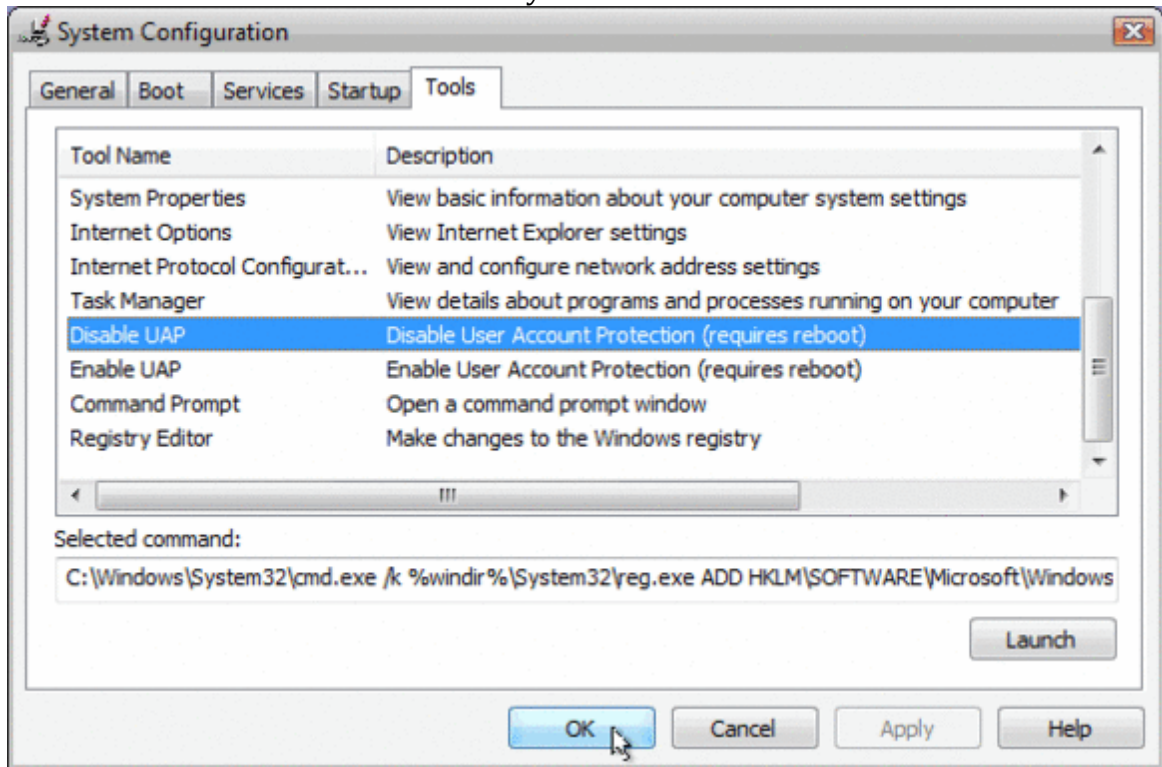

You will need to restart your computer for UAC to be turned off.

Windows Vista

Disable UAC by using one of the following methods:

1. Launch MSCONFIG by from the Run menu.

2. Click on the Tools tab. Scroll down till you find "Disable UAC" . Click on that line.

3. Press the Launch button.
4. A CMD window will open. When the command is done, you can close the window.
5. Close MSCONFIG. You need to reboot the computer for changes to apply.

You can re-enable UAC by selecting the "Enable UAC" line and then clicking on the Launch button.
